

MARIO TORRES LAGOS

Senior Software Engineer · Backend & Automation (Python)

mariotorreslagos@gmail.com | +56 9 9220 9388

Santiago, Chile | Chilean–Italian citizen (EU passport) | Remote-ready

linkedin.com/in/mario-torres-lagos | github.com/wottan32

PROFESSIONAL SUMMARY

Senior Software Engineer with 6 years of experience, focused on backend development and automation with Python. Strong track record building scripts, services, and tooling that automate engineering and data workflows, integrating systems through REST APIs. Daily work in Linux (Ubuntu) with Docker and CI/CD. Experienced operating autonomously within distributed, multi-country teams, turning ambiguous requirements into reliable, maintainable software.

My entire stack is built on open-source tools. **English C1, validated by UK A-Levels.** EU passport. Available immediately.

TECHNICAL SKILLS

Languages & Scripting: Python (scripting, automation, FastAPI, async, pytest) · Bash · SQL · JavaScript · C#

Automation & Integration: Process automation · REST API design & integration · data pipelines · scheduled jobs · schema validation · structured logging & observability

Environments & Tooling: Linux (Ubuntu, Zsh) · Docker · Kubernetes · Git / GitHub Actions · CI/CD

Cloud: GCP — primary (Cloud Run, Cloud Functions, BigQuery, GKE, Cloud Storage) · Azure · AWS (exposure)

Databases: PostgreSQL · SQL Server · MongoDB · BigQuery

Also familiar with: LLM & RAG integration (MCP, ChromaDB) through personal projects · prompt engineering

PROFESSIONAL EXPERIENCE

Kantar Worldpanel LATAM (via Adecco) Mar 2025 – May 2026

Software Developer · Santiago, Chile · Remote LATAM

- Designed and built a Python CLI (Typer) for multi-country survey data processing across 5 LATAM markets (43M+ records): SQL Server + Qmod API integration, parallel downloads via ThreadPoolExecutor, parquet caching, and Excel reporting. Collaborated on its scheduling for unattended execution.
- Front-end development in Vue.js consuming FastAPI services — daily work with backend endpoints (integration, reading, debugging), in collaboration with the backend team.
- Developed a .NET 8 Worker Service (fully owned end-to-end) that automated file and photo synchronization between local directories and SharePoint Online across 8 LATAM countries (Microsoft Graph API, Docker), replacing manual processes with monitored, hands-off automation.
- Contributed to improvements on a production OCR pipeline: identified a recall bottleneck in the TF-IDF pre-filter and proposed reframing the system as an analyst-assistance tool (top-3 candidates) rather than a full replacement.
- Daily work in Linux environments with Docker and CI/CD (GitHub Actions); open-source tooling across the stack.

Enlig10 Feb 2024 – Feb 2025

Founder / Full Stack Developer (own venture) · Santiago, Chile

- Founded and ran a software development venture delivering full-stack projects with Python, FastAPI, and PostgreSQL — from requirements and technical design through implementation and deployment.
- Built automation scripts and integrations for client workflows, with end-to-end ownership of delivery.

Valio Nov 2023 – Feb 2024

Full Stack Developer (contract) · Santiago, Chile

- Backend development in Python/Django for internal business systems and data integrations.

SII Group Feb 2023 – Nov 2023

Full Stack Developer (contract) · Santiago, Chile

- Backend services in Python and .NET for enterprise clients; integration with internal APIs and databases.

Independent / Freelance Jun 2020 – Dec 2022

Full Stack Developer · Santiago, Chile

- Independent projects in Python (Django, Flask), React, and Angular for financial analysis, environmental data, and systems modernization — including automation scripts and API integrations.
- Direct client relationships: requirements gathering, architecture, delivery, and maintenance.

PERSONAL PROJECTS

Active practice with LLM orchestration, RAG, and multi-agent patterns through personal projects on OpenClaw (an open-source multi-agent platform used as a personal lab), applying MCP (Model Context Protocol), ChromaDB, and prompt engineering. I use it to stay current with AI-engineering practices alongside my core backend work.

EDUCATION

Computer Engineering — DUOC UC, Chile (2019 – 2022)

A-Levels — St. Peter's Catholic School, Guildford, UK · basis for C1 English validation

CONTINUOUS LEARNING & CERTIFICATIONS

- **Harvard University (edX)** — CS50P – Programming with Python · CS50x – Introduction to Computer Science
- **Google Cloud (Credly)** — Skill badges: Apigee X (API development & security) · BigQuery ML · Machine Learning APIs · Compute Engine
- **IBM / Coursera** — Full Stack Cloud Developer · Cloud Native & DevOps · Data Analyst Professional Certificate
- **Google / Coursera** — IT Automation with Python · IT Support Professional
- **DeepLearning.AI** — Generative AI for Software Development · Generative AI for Everyone
- **Princeton University** — Analysis of Algorithms

LANGUAGES & AVAILABILITY

Languages: Spanish (native) | English C1 (validated by UK A-Levels)

Availability: Immediate · Open to remote and hybrid · EU passport (authorized to work in Europe)
